

AGILE, PROJECT- FOCUSED, INTEGRATED ENGINEERING SOLUTIONS.

GSENGINEERING.COM

INNOVATION. REALIZED.

GS Engineering, Inc. is an established multi-disciplined company focused on innovation and product realization. Our team provides turn-key engineering solutions with a managed programs approach supporting mechanical and electrical design, modeling and simulation, laboratory and field test activities, and production of components throughout the product lifecycle.

As an employee owned company, our team carries a level of drive and dedication to building professional relationships, earning trust, and achieving mutual success. Our proven track record of successful project completion is a direct result of our disciplined utilization of standardized

Product innovation
that's urgent, accurate,
and complex.

procedures, proven processes, established supply chains, and our experienced team of professionals operating to AS9100D / ISO9001:2015 quality standards. These strengths are reflected in a successful history supporting all branches of the military, vehicle original equipment manufacturers (OEMs), as well as off-highway, aerospace, and rail markets.

Our team has comprehensive skill sets and diverse experience, including: mechanical engineers and designers, electrical engineers, quality engineers, test directors, test engineers and technicians, and administrative support staff. This broad background enables us to excel in integrating new and cutting edge technology into our clients' products. We also have platform- and system-level expertise focused on light all-terrain vehicles, all classes of tactical wheeled vehicles, all classes of tracked vehicles, trailers for a variety of end uses, rail products, and components for rotary and fixed wing aircraft. This knowledgebase further extends to

ancillary platforms such as weapons, C4/C5ISR integrations, IED defeat, and other militarized systems.

PROFESSIONAL. INTEGRATED. SOLUTIONS.

By leveraging resources at our Michigan-based headquarters with high-bay and test facilities, working on-site at client locations, and utilizing ultra-fast and secure remote desktop technology to work directly within our clients' networks, our team can efficiently collaborate with our clients on complex programs. Whether providing integrated engineering support for large organizations, or specialized skill sets where resources are limited, our team understands our clients' desire for innovation and strives to solve critical problems quickly and effectively.

GS Engineering has evolved from a small services organization to an established company providing turn-key solutions across a broad spectrum of markets, clients, and products. This experience supports rapid adaptation to our client's challenges. With our skilled workforce embracing aggressive schedules and completing complex objectives, GS Engineering is here to help you succeed.
