

DynLogistics Capability Overview

Base Operations Support (BOS) and Contingency Operations Support: We deliver contingency support to augment the U.S. military force structure. Services include disaster recovery, minor construction, engineering, transportation, power production, fire suppression, operations and maintenance of facilities and structures, food service, training exercise support, and other activities.

Maintenance Repair Overhaul (MRO) Support for Military and Civilian Fleets: DI provides a wide array of ground vehicle support services, from ground vehicle sustainment, end-to-end maintenance solutions, and lifecycle aftermarket logistics support. Our professionals are skilled in engineering, modification, maintenance, program management, continuous improvement, and quality control.

Capacity Development, Training, Advising, and Mentoring: We offer integrated basic and advanced military and policy training and mentoring solutions to fit any situation.

Intelligence Training and IT Solutions: Our intelligence training capabilities include classified and unclassified integrated collection, analysis, training, and technology solutions. Our IT solutions capabilities include global classified and unclassified Enterprise IT, engineering, facilities, and logistics support.
