

PLATFORMS: SMARTER MISSIONS: SMARTER

General Dynamics Mission Systems provides mission critical solutions to those who lead, serve and protect the world we live in. We are a technology integrator and original equipment manufacturer with deep domain expertise in ground, sea, air, space and cyberspace. Our technology and products are often built into platforms and integrated systems to make them smarter. We have industry leading technologies and a unique combination of products and capabilities that are purpose built for high consequence of failure C4ISR and cybersecurity applications. With more than 60 years of proven performance, we enable our customers to stay ahead of evolving threats and successfully accomplish their missions.

GPS SOURCE, INC.

GPS Data Transmission and Validation

Enabling GPS & APNT data retransmission and validation in mission critical and commercial environments.

GPS Source, Inc. a subsidiary of General Dynamics Mission Systems, manufactures and sells GNSS signal distribution and validation products, solutions, and services. Serving DOD, Federal Government, aerospace, public safety, commercial telecommunications, automotive, and other demanding markets, GPS Source's products add value on a daily basis to the successful operations of our customers around the world. GPS Source also has developed the first deployed vehicle and ground based assured positioning, navigation, and timing (APNT) solution, MAPS GEN-1, based on the SENTRYSCOUT® APNT system.

With over 30 years of collective experience in the GNSS industry, including a staff of seasoned RF, APNT, and GPS systems engineers, GPS Source has the flexibility and technical know-how to design and deliver complete solutions for your unique GNSS signal distribution needs.

TACDS®

Tactical Cross Domain Solution Product Family

Enabling Secure Cross Domain Information Sharing at the Tactical Edge

TACDS is General Dynamics' tactical cross domain solution (CDS) that enables information sharing across different security domains in austere tactical environments. TACDS is a Low Size, Weight, Power and Cost (SWaP-C), rugged, tamper-resistant CDS that comes in two form factors, TACDS-Vehicle Mount (VM) and TACDS-Low Profile (LP). The flexibility and configurability of both form factors make them ideal for use in unmanned systems, ground vehicles, mobile shelters, ground sensor systems, ships, and aircraft.

- Meets NSA's Phase 1 Raise the Bar Requirements
- Lowest SWaP-C Tactical Hardware CDS in Production Today
- Secret and Below Interoperability (SABI) certified
- Supports Dozens of Tactical Message Formats
